- ★ Includes automatic card feeder, blister feeder & finished package unloading
- ★ Extra large Format 14" x 28" sealing area
- ★ 7 open stations for product loading or customer furnished automation
- ★ Optional finished package transfer mechanism offered

Description

Starview's CBS Series Automated Inline Conveyor type blister sealing machines are ideal for high volume or JIT production. Given the proper conditions these machines are capable of up to 20 cycles per minute in production. The Automated Inline Conveyor blister sealing machines are built with the capability to feed blister(s), blister card(s) and discharge finished packages when proper tooling is installed. With seven (7) open loading stations these machines are ideal for automated product loading or where multiple items are to be placed in a single package. Machines with other sealing areas and different numbers of stations are also available.

Starview's CBS Series Automated Inline Conveyor type blister sealing machines can be designed to include optional features such as additional automatic feeders, pick and place transfer mechanisms on finished package out-feed and discharge conveyors. Additional PLC I/O's may be added for interface with customer supplied systems.
