

STARVIEW™

PERSEUS & POLARIS SERIES AUTOMATIC INLINE FILM TO TRAY FOOD PACKAGING MACHINES

Typical Perseus (upper right) and Polaris (lower left).

- ★ Complete PLC machine control with Touch screen operator interface
- ★ Machines offered for applications that require modified atmospheres (MAP)
- ★ Automatic film feed, seal & trim and scrap rewind for clear, random or registered print film
- ★ Automatic tray feeder available
- ★ Stainless steel wash down design

Description

Starview's Perseus & Polaris Series machines are designed and competitively priced for "fresh counter" packaging, typically a clear or printed film to a preformed tray for food manufacturing companies, catering, grocery stores, etc. The Perseus or Polaris Vac should be purchased where it is desirable to provide a modified atmosphere in the package prior to sealing. The Perseus or Polaris Pac will produce only sealed packages without a modified atmosphere. The Perseus & Polaris Series are ideal for medium to high production. This series machines can adapt to seal for a wide range of product tray sizes by simply changing the tooling. The Perseus & Polaris Series machines trim the film to the profile of the tray and automatically rewind the scrap web. The Perseus & Polaris Series sealers will provide years of dependable performance with a minimum of maintenance.

Starview's Perseus & Polaris Series machines are offered with a range of options to make them more versatile. Options include tray feeders, longer in-feed conveyors, powered out-feed conveyors with tray aligners and sensors for pre-printed and registered film.
