BubbleWrap®

A SEALED AIR BRAND

Nothing Protects Better Than The Original

As the inventors of Bubble Wrap® brand cushioning over 45 years ago, our secret to a better bubble has always been starting with a full air bubble and keeping a full air bubble. Simply stated, in order to protect your products from the hazards of the shipping environment, the air has to be there and stay there. How do we do it?

“The Difference Is In The Barrier”

Bubble Wrap® Brand

Sealed Air® Barrier Bubble® Retains Cushioning Thickness

Non-Barrier Brand

Other Non-Barrier Brands Lose Cushioning Thickness

Sealed Air® Barrier Bubble® Technology Is A Better Value

Superior Cushioning — Higher initial thickness and fullness provide up to 30% greater protection.

Reduced Costs — Less material is required for protection over non-barrier brands.

Longer Lasting Protection — Air retention layer maintains consistent cushioning throughout the shipping cycle.

Environmental Benefits

Source Reduction — Provides better protection using less packaging material compared to loose fill or paper.

Damage Reduction — Eliminates the need to ship replacement products in additional packaging materials.

Reusable — Air retention layer allows for multiple reuse.

Recyclable — Can be recycled at eight Sealed Air sites and at many independent recyclers.

For superior cushioning, surface protection, void fill and specialty applications, look for the Bubble Wrap® brand symbol.

Cushioning/Void Fill

Surface Protection

Specialty Products

Bubble Wrap® Brand
Strong Grade Cushioning

Addresses the needs for:

- Fragile or valuable products
- Long or unpredictable distribution cycles
- Cushioning heavy or more fragile products
- Items requiring secure blocking and bracing

Meets the requirements of Mil. Spec PPP-C-795D and CID A-A549.

Bubble Wrap® Brand
Multi-Purpose Grade Cushioning

Addresses the needs for:

- Light to medium-weight, less fragile products
- Short or predictable distribution cycles
- Products requiring surface protection, interleaving, cushioning and void fill

Meets the requirements of commercial item description CID A-A549.

Bubble Wrap® Brand
Limited Grade Protection

Addresses the needs for:

- An efficient void fill alternative
- Lowered material costs
- Better protection than loose fill
- No mess

Meets the requirements of commercial item description CID A-A549.

Bubble Mask®
Adhesive-Coated Cushioning

Air cellular cushioning with an adhesive coating.

- Provides lightweight cushioning/surface protection
- Adheres to a variety of clean surfaces
- Saves labor and material costs
- Available in a variety of Barrier Bubble® heights

Cold Seal® Bubble Wrap® Brand
Cohesive-Coated Cushioning

Air cellular cushioning material with a cohesive coating.

- Sticks to itself, not to the product
- Applies easily
- Saves labor by reducing handling
- Eliminates tape

Bubble Wrap® Brand
FDA Grade Cushioning Material

Food-safe air cellular material for protecting food items.

- Made from 100% virgin resin
- Allows immediate contact with food substances
- Moisture resistant
- Heat sealable

ESD (Electrostatic Discharge)
Protective Products

Designed to protect sensitive electronic components, ESD products include:

- Anti-Static Barrier Bubble® material
- Cushionshield™ aluminum air cellular static-shielding laminate bags

Bubble Wrap® Brand
Bags

Saves time and labor.

- Convenient peel-and-seal closure
 - 10 standard size offerings
 - Available in regular and anti-static
- Small** bubble height

Bubble Wrap® Brand
Kraft Laminates

Designed for wood veneer protection needs.

- Excellent outer protection
- Kraft backing allows easy application of labeling, stenciling and manual markings
- May eliminate outer carton for certain applications

3rd Web Bubble Wrap® Brand

Laminates

Addresses the needs for:

- Superior product cushioning via triple-layer construction
- Excellent surface protection
- Outstanding resistance to tears and punctures

Bubble Wrap® Ready-To-Roll®

Air Cellular Dispenser Cartons

Ideal for use in mailrooms or small shipping areas.

- Self-dispensing and easy-tear convenience
- Available in 12" or 24" widths
- Standard **Small** and **Medium** bubble height offerings

TempShield™

Reflective Laminates

A lightweight, easy-to-use thermal insulating material that protects products from dramatic fluctuations in temperature.

- Tough and durable
- Stops heat transfer
- FDA approved materials
- **Metalized** (72% reflective) – Tougher than foil
- **Foil** (97% reflective) – Best thermal value

Select The Right

BubbleWrap®

BRAND

Barrier Bubble® Material For Your Application

Bubble Height

Small

Medium

Large

Bubble Wrap® Brand Strong Grade

For heavy, fragile and/or valuable products with long or unpredictable distribution cycles. Meets requirements of Mil. Spec. PPP-C-795D and CID A-A549.

Product	Height	Suggested Uses
CS	Small	Interleaving and/or surface protection.
TS	Medium	Cushioning of fragile, medium-weight products.
DS DS 2 DS 4	Large	Multi-purpose cushioning applications. High performance cushioning materials for extreme psi loading, blocking and bracing. Available in (2) times & (4) times the normal (DS) strength.

Bubble Wrap® Brand Multi-Purpose Grade

For light to medium, semi-rugged products with shorter, predictable distribution cycles. Meets requirements of commercial item description CID A-A549.

Product	Size	Suggested Uses
CM CM AS CM CO CM AD	Small	Cushioning of light to medium-weight products. Available in Anti-Static (AS), Cohesive Cold Seal® (CO), and Adhesive Bubble Mask® (AD) materials.
TM	Medium	Cushioning and/or void fill for light to medium-weight products, which can replace 1/2" non-barrier material.
DM DM AS DM AD	Large	General purpose cushioning and/or void fill. Available in Anti-Static (AS) and Adhesive Bubble Mask® (AD) materials.

Bubble Wrap® Brand Limited Grade

For surface protection and/or void fill applications with very short known shipping cycles.

Product	Size	Suggested Uses
CL	Small	Surface protection and/or interleaving.
DL	Large	Void fill for lightweight, less fragile products.

Which Is The Right Product For You?

Call 1-800-648-9093 to contact a Sealed Air representative or visit us online at www.bubblewrap.com.

The Sealed Air® Barrier Bubble® Advantage

Bubble Wrap® brand offers many advantages over other types of cushioning, including reduced material, labor and shipping costs with better cushioning performance.

Significant air retention equals better cushioning performance. Multiple impacts during the shipping cycle can cause material to compress without recovery, resulting in a loss of thickness and cushioning performance. For example, paper does not recover well after impact. As can be seen in the photos above, under a nominal 0.25 psi load, lofted paper loses nearly half its original thickness after only three drops from 24 inches while Sealed Air® Barrier Bubble® material retains more than 90% of its protection.

The Systems Approach

Sealed Air can help you design a manual or automated packaging system to increase the efficiency and overall productivity of your work station or on-line packaging operation. Ask your Sealed Air representative for details.

Value Analysis And Package Design Services

Your Sealed Air Consultative Sales Representative will provide you with a detailed value/cost analysis of your entire packaging operation. This service is designed to qualify and quantify your packaging needs, enabling us to make recommendations aimed at improving overall efficiency. The analysis includes:

- The best package design method for your application, utilizing our worldwide network of Packaging Design and Development Centers.
- The ideal packaging material and system needed to solve your most challenging packaging problems.
- The value analysis of the cost and productivity savings associated with a Sealed Air solution.
- The best training and support services in the industry to ensure that you are using Sealed Air® products effectively and economically, right from the start.

Creating World Class Packaging Solutions

Sealed Air is a leading global manufacturer of a wide range of fresh food, protective and specialty packaging products. Reaching nearly 80 percent of the world's population, many Sealed Air brands are among the most respected names in their markets.

Our products protect and preserve our customers' products from the plant or warehouse through the rigors of the distribution chain. Many Sealed Air® products also provide an appealing merchandising presence for retail display.

Sealed Air's industry-leading investment in research and development and constant focus on World Class Manufacturing principles allow us to continually deliver innovative packaging solutions that add measurable value to our customers' businesses around the world.
