

STARVIEW™

ERB SERIES SEMI-AUTOMATIC ROTARY BLISTER SEALING MACHINES

ERB6-1418 (upper left) and ERB8-1824 (lower right).

- ★ Four, six and eight-station models offered
- ★ Optional card feeder and finished package unloader available for most models to increase versatility
- ★ Excellent for contract packagers, workshops and OEM's
- ★ Wide range of seal areas
- ★ Heavy-duty Industrial design for long life

Description

Starview's ERB Series rotary type heat sealers are designed for medium to higher volume production requirements. These machines may be used for conventional carded blisters, full face blisters and half-clamshell styles as well as applications using Tyvek, foils and other heat sealable lidstock. The standard machines feature one sealing station with the remaining stations used for load/unload stations.

Starview's ERB Series rotary heat sealers are designed to include an optional automatic card feeding system and automatic package discharge system on most models. These may be self-standing or permanently attached depending on the model. A quick-change face plate mechanism as well as an adjustable sealing cylinder stroke option is offered to improve productivity and reduce set-up times.

SPECIFICATIONS

Model	ERB4-1418	ERB4-1824		
Sealing Area:	14" x 18"	18" x 24"		
No. open stations:	3	3		
Opt card feeder:	Self-standing	Attached		
Opt pkg. unloader:	Self-standing	Attached		
Max blister depth:	3.25"	3.25"		
Avg. cycle speed:	1-15 cpm	1-15 cpm		
Approximate size:	64W x 55D x 63"H	73W x 65D x 63"H		
Approximate wt:	1200 LB.	1300 LB.		

Model	ERB6-1418	ERB6-1824	ERB8-1418	ERB8-1824
