WULFTEC® WRWA-200 HORIZONTAL STRETCH WRAPPER

Wulftee Rethinks Horizontal Wrapping

THE NEW, IMPROVED WAY TO WRAP DOORS, WINDOWS, CARPETS, TEXTILES, LUMBER, COPPER PIPING, MAGAZINES, CORRUGATED TUBING... AND MORE.

Maximize the use of stretch film. The WRWA's NO-THREAD® Powered Pre-Stretch Carriage optimizes film performance, using less film without compromising wrapping strength. Contrary to the competition, light gauge film may be used with this machine. State-of-the-art AC variable frequency drives ensure low maintenance, saving valuable time and money. Troubleshooting is easy, with quick identification by the digital panel interface.

The WRWA-200 carriage features a loading clamp and rapid-lock film roll device that make loading a snap. Everything can be done in the same area, with easy access to the carriage for simplified re-loading. Maintenance free clamping and cutting device. The user-friendly digital panel interface offers multiple mode selection for more flexibility. Just set, load and go!

CRAFTED FOR SUCCESS

For increased productivity, this quality engineered stretch wrapper features:

- A precise heavy-duty ring bearing gearbelt drive system
- Bluetooth technology used for reduced maintenance

THE WULFTEC PROMISE

Having a Wulftec® stretch wrapping machine on the production line is a powerful statement. It's an investment in strong values, because Wulftec is dedicated to manufacturing only the best. It's an investment in all-steel construction, for increased stability and strength. It's an investment in success, because Wulftec® equipment is designed and built to work hard.

TECHNICAL SPECIFICATIONS

PRODUCTION RATE* LOAD SIZE

LOAD WEIGHT

- Up to 120 loads per hour - Maximum diagonal load dimension must be 8" (4" on each side) shorter than ring size
- Up to 5,000 lbs
- MACHINE DIMENSIONS - See diagram
 - 3,000 lbs to 6,000 lbs depending on model & options
 - 230V/3/60 20A
 - Up to 6 CFM @ 80 PSI comes with FR (Filter, Regulator)
- 20" NO-THREAD® powered pre-stretch carriage with FILM DELIVERY SYSTEM revolutionary spring loaded carriage gate
 - Rapid-lock film roll device

- 36, 60, 90 inch diameter

AVAILABLE RING SIZES

ELECTRICAL REQUIREMENTS

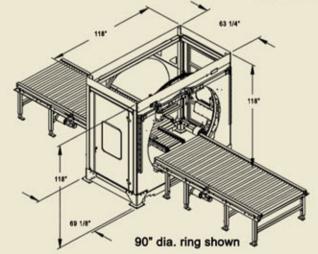

PNEUMATIC REQUIREMENTS

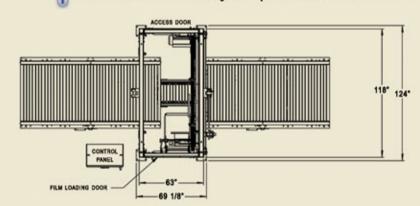

- Top hold down OPTIONS

WARRANTY

- - Side guides Transformer

 - Heat seal
 - Bridge conveyors
 - Dual bridge conveyor
 - Conveyors (belt, chain, rollers, gravity)
- Heavy-duty structural steel construction STRUCTURE
 - Ergonomically friendly film loading carriage position
 - 3-year unlimited cycle warranty
 - 3-year warranty on ring bearing
 - 10-year warranty on steel structure
 - Lifetime warranty on pre-stretch rollers' blue compound

Reduced energy usage by throughput anticipation on automatic machines: Machine will operate at a lower speed when the throughput from the line is slower and speedup to allow production bursts. For an average production line[†] the energy savings would equal 20 x 40W lamps lit for 6 hours.

Reduced film waste by optimized resolution: Machine will use a higher resolution positioning system to deliver the film in a more accurate quantity - this means an average film reduction of 4 feet of film per pallet when compared to other control systems. That's 60 miles of unstretched film per year.

Reduced general waste by better product protection for handling and transport: The product is properly secured to the pallet, resulting in a pallet that is more stable for transport, and therefore less damage.

WE FEAR NO PACKAGING CHALLENGE

By using VFD on all motors, this ensures that only the power required by the load is used, regardless of the HP of the motor.

- * PRODUCTION RATE BASED ON LOAD AND MACHINE SIZE AND CONFIGURATION
- † Based on a production rate of 60 pallets per hour, 2 shifts, where 50% of the production is in "peak-mode", 250% pre-stretch
