

Zenith UNIBAG®

Example of products.

UNIBAG Packs:

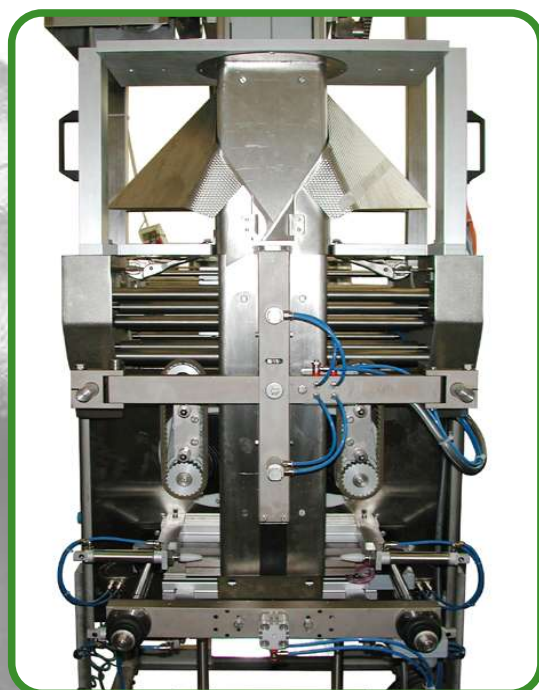

- Wrapping system for soft and delicate products mostly used in the greengrocery sector;
- Flexible packs with square base with the possible addition of an ergonomic handle;
- Absolutely innovative wrapping system (patented by PFM);
- Flexible material printable along the entire pack;
- Reduction in the wrapping material used resulting in savings, benefits to the environment and market competitiveness;
- Convenient and handy shape;
- Hygienic and easy to carry;
- Attractive appearance.

With the use of the **UNIBAG** design applied to the Zenith machine, PFM is able to carry out vertical wrapping of the most delicate products, while perfectly preserving their integrity. An exclusive system prevents the product from falling freely into the pack, as has been the case up to now, but carries it along delicately throughout the entire filling and wrapping stages.

PFM Zenith UNIBAG

With the arrival of the **PFM UNIBAG**, we can finally leave behind the expensive hard packets obtained with two or more types of wrapping material, and welcome the packaging system of the third millennium: **UNIBAG** is an advanced, extremely convenient *flow-pack* packet, having three seals and a square base, which is taken off a reel of just one type of heat-seal wrapping material, such as laminated or bonded polypropylene. This PFM solution is dedicated to the extremely delicate greengrocery sector.

PFM Zenith UNIBAG - Main Technical Data:

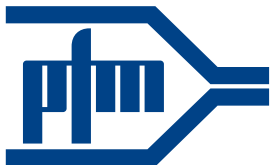

- 30/40 mechanical cycles per minute;
- Attractive appearance;
- Easy size changing;
- Electronic temperature control;
- Intermittent sealing system;
- Designed to facilitate cleaning and routine maintenance operations;
- PLC controlled functions with programmable keyboard.

This wrapping procedure takes place automatically, with no drops, bruising or shocks, integrally preserving the original appearance and freshness of the most delicate products, in such a way as to optimise their preservation period and quality.

Loading conveyor belt with interchangeable pushers.
